

**Asking questions**

Asking questions that can be answered using a scientific enquiry.

**Making predictions**

Using prior knowledge to suggest what will happen in an enquiry.

**Setting up tests**

Deciding on the method and equipment to use to carry out an enquiry.

**Observing and measuring**

Using senses and measuring equipment to make observations about the enquiry.

**Recording data**

Using tables, drawings and other means to note observations and measurements.

**Interpreting and communicating results**

Using information from the data to say what you found out.

**Evaluating**

Reflecting on the success of the enquiry approach and identifying further questions for enquiry.
